To Whom It May Concern

Sub: Internship support letter for Mr. Lokesh Goud Dabbi at Rythu Sadhikara Samstha (RySS- APCNF)

I am writing to express my full support for Mr. Lokesh Goud Dabbi's internship application at the **Rythu Sadhikara Samstha (RySS)**, *Andhra Pradesh Community Managed Natural Farming (APCNF)* Farmer Managed Experimental Station in West Godavari, Andhra Pradesh, India. Mr. Lokesh Dabbi, currently pursuing his Master's degree in Organic Agriculture and Food Systems at the University of Hohenheim, has demonstrated a strong academic background and a genuine passion for regenerative agriculture. His proposed research project, titled "*Long-Term Assessment of Soil Properties under Andhra Pradesh Community Managed Natural Farming (APCNF) Compared with Conventional Rice Cropping Systems*," aligns with the core goals of our organization and the broader objectives of sustainable agricultural practices.

The aim of this project is to evaluate the long-term impacts of APCNF practices on soil health, food security, and environmental sustainability, with a specific focus on contrasting the effects of these practices against conventional rice cropping systems. In partnership with CGIAR – World Agroforestry, and the Indo-German Global Academy for Agroecology Research and Learning (IGGAARL-RySS), this project will provide Mr. Dabbi with a comprehensive, hands-on learning experience in Agroecology research while contributing significantly to our ongoing efforts to promote sustainable farming practices in the region, under the direct mentorship of Dr. Zakir Hussain, Senior Thematic Lead, Indo-German Global Academy for Agroecology Research and Learning, Andhra Pradesh, India (IGGAARL).

I am confident that Mr. Dabbi's involvement in this research project will not only enhance his academic knowledge and skills but will also provide him with invaluable insights into the practical challenges of sustainable agriculture. His passion, academic rigor, and commitment to promoting sustainable agricultural solutions will make him an asset to our team and contribute positively to the success of this project. We are excited to host Mr. Lokesh for this internship from **April 2025** at our research station, and we look forward to working closely with him during this time.

12/3/2025

B. Ramarao
